

PRODUCT EVALUATION DIRECTORY: README

GradRight Talent Hunt Beta Product Evaluation

Executive Welcome

Welcome to my submission directory for the GradRight Talent Hunt Beta Product Evaluation. This directory contains a rigorous, end-to-end evaluation of visual interface (UI) issues and core user experience (UX) friction points identified during active, hands-on beta testing of the GradRight mobile platform.

As an engineering graduate, my goal was to look past surface-level flaws and perform a deep-dive analysis that balances technical performance metrics with strategic user empathy. The files structured within this directory are designed to provide your engineering, design, and product management teams with immediate, actionable feedback to polish the application for launch.

IMPORTANT: Recommended Reading Order

1. **FIRST:** GradRight_UI_UX_Audit_Clean.pdf (UI Report)
2. **SECOND:** 02_UI_Annotated_Screenshots/ Folder
3. **THIRD:** Product_UX_Evaluation_Report.pdf (UX Report)
4. **FOURTH:** 01_UX_Screen_Recordings/ Folder

```

Device & Performance Evaluation

Testing Device: **POCO F7 5G** (Snapdragon 8s Gen 4, 12GB RAM, 120Hz Refresh Rate). Despite high-end hardware, the app suffers from sluggish navigation, weak multi-tasking (frequent reloads/dropped frames), and architectural layout resets.

Summary of Audit Reports

1. UI Evaluation & Visual Gaps

Issues include content gaps (empty boxes/circles), wasted layout space, unoptimized small tap targets, visual discordance due to color inconsistencies, and typography hierarchy issues.

2. UX Logs & Critical Flows

Top 3 issues: Swipe-Back App Exit (exits app instead of returning home), Profile Menu Lifecycle Flaws (freezes on screen), and Broken Community Safety (no moderation/illogical report-to-edit flow).

Gratitude & Closing Thoughts

I would like to express my sincere gratitude to the GradRight team. As an engineering graduate, I understand that building a premium experience requires balancing rigorous technical logic with strong user empathy. I look forward to the possibility of discussing how my analytical mindset can contribute to the GradRight vision.

Best regards, Swasthik | Engineering Graduate
