

PRODUCT SUGGESTIONS: GradRight Platform Evolution

Strategic Roadmap for Improved User Engagement & Retention

To: The GradRight Product Team

From: Swasthik

Methodology & Insights

These recommendations emerged from rigorous hands-on beta testing. While exploring the platform, I identified critical friction points where user flow is interrupted by UI inconsistencies and functional gaps. By approaching the interface as an engineering graduate, I focused on bridging the gap between technical potential and intuitive user experiences, aiming to transform the platform into a cohesive, high-retention ecosystem.

Top 10 Strategic Recommendations

#	Feature	Placement	Why It Matters
1	Global Navigation "GradNews" Tab	Bottom Navbar	Centralizes industry trends to transform the app into a daily destination, reducing external search abandonment.
2	"My Journey" Task Dashboard	Global Nav / Home	Provides a clear, step-by-step accountability map for complex admission cycles, significantly reducing user anxiety and drop-off.
3	Integrated Event Tracker	Resources Tab	Ensures critical application and webinar dates are never missed by enabling seamless local calendar synchronization.
4	Interactive Progress Tracking	Profile / Dashboard	Visualizes user milestones in real-time to gamify the otherwise daunting and transactional nature of university application processing.
5	Smart FAQ Sidebar (AI-Driven)	Chat/Support	Deploys page-specific, contextual knowledge bases to provide instant resolution, reducing the load on support teams.
6	High-Fidelity Micro-Animations	UI-wide	Adds a premium, fluid aesthetic layer that aligns the application's visual feel with high-end hardware capabilities like 120Hz displays.
7	Unified Design System	App-wide	Standardizes the color palette and typography to eliminate visual discordance, building long-term brand trust and readability.
8	Offline Resource Access	Resources	Maximizes utility for users in fluctuating network environments by allowing critical guides and checklists to be stored locally.
9	Course Completion Tracker	"Saved" / My Learning	Provides granular visibility into module progress for online degree programs, keeping learners engaged and motivated.

#	Feature	Placement	Why It Matters
10	Dynamic Empty-State States	Content Feeds	Turns "dead" screens into active engagement nodes, offering immediate "Get Started" pathways to maintain momentum.

Strategic Deep-Dive

1. Global Navigation Refresh

The existing navigation suffers from clutter. By introducing a "GradNews" tab, we create a recurring value proposition that invites daily engagement rather than infrequent utility usage.

2. Task & Event Management

The current lack of a centralized dashboard leads to missed deadlines and fragmented planning. A "To-Do" system integrated with a calendar tracker provides necessary structure, fostering a sense of accomplishment as users mark tasks as complete.

3. UI/UX Polishing

A unified design system is essential for institutional trust. Furthermore, implementing spring-physics based micro-animations will elevate the user perception of the app, ensuring that high-performance hardware feels responsive and premium.

How This Positions GradRight

These enhancements shift the platform's identity from a transactional tool to a holistic co-pilot. This strategic evolution will:

- Increase Daily Active Users (DAU) by embedding the app in the user's daily information routine.
- Boost long-term retention by gamifying milestones and reducing user churn through intuitive support.
- Minimize friction points that currently force users to rely on external platforms for critical information.
